

SAM

The Superior Solution to Site Management

Do you need one solution to manage travel, accommodation and rostering?

Take care of your people from the moment they leave home to the time they return. Quickly develop workable, cost effective rosters and shift patterns.

With people at the heart of site operations, efficient workforce management and people tracking is key to reducing your costs and keeping employees happy.

People tracking software has become a critical tool for rosters, travel and accommodation during the construction and operational phases across many industries.

SAM Key Features

- Manage Profiles
- Book Rosters
- Assign Rooms
- Room Optimisation
- Transport Bookings and Manifests
- Multiple Camp Management
- Forecasting
- Operational Reporting
- Financial Reporting
- Third Party Integration

Accounting

SAM provides a single solution for managing cost information, simplifying employee management and manpower forecasting.

Travel & Accommodation

SAM not only makes organising travel and accommodation more convenient, it helps with campsite and operations management. Whether creating bookings or running rosters, SAM uses profile information to secure appropriate travel and accommodation arrangements for each individual.

Effective profiling will enable you to quickly identify positions, commute bases, departments, employers, cost codes, flight groups, crew rosters, site contacts and even accommodation preferences for people working away from home.

Room Utilisation

Empty rooms and unplanned vacancies are a waste of your assets. SAM assists you in running your site more efficiently and productively.

Features include the intelligent allocation of rooms based on optimal, best-fit requirements during peak periods, which provide significant cost savings.

Reliable Travel, Accommodation and Rosters

Benefits of SAM include:

- Synchronise travel, accommodation and rostering
- Flexibility to change with your business
- Highly automated
- Simplifies complexity
- Proven ROI
- Real Time Facts with Scheduled
- Risk management
- A system that tracks all site personnel
- A reliable back-charging system
- Multi-site and multi-camp management
- Maximised room utilisation
- Cleaning schedules integrated with rosters, for maximum efficiencies

Multi-site & Multi-camp Management

SAM is flexible, catering for small construction projects through to large operational projects. It also caters for organisations with multiple sites that are looking to create inter-site transfers of employees, contractors or visitors.

SAM can track and report on the whereabouts of individuals across all sites. Security level access allows administrators to view accommodation availability across all sites. The combination of camp and location reporting provides management with an immediate overview of operations.

Cleaning Schedules

SAM provides accurate and reliable, single report cleaning schedules, to replace the cumbersome management of room cleaning timetables using spreadsheets.

Routine Medical Checks

SAM assists in ensuring that medical checks are regulated, by tracking whether employees undergo regular assessments. SAM sends email notifications to employees to remind them to book in for their medical checkup.

SAM is encrypted with security passwords and access checks, to ensure that personal records are confidentially managed.

Locker Management

Locker management is provided for projects that require motelling. SAM enables the coordination and control of all areas of locker management to simplify locker assignment and reduce operational costs.

Reporting

SAM enables a high level to granulated view of site operations with a range of inbuilt reports, developed specifically with your needs in mind. Additional, customised reports can be developed on an as needs basis, at minimal cost.
